DETAILED ACTION

Response to Amendment

- 1. Based upon the submitted amendment (7-29-2005), the examiner notes that claims 1,6,8,13,16,17 have been amended and claims 3-5,10-12,15,18 have been cancelled.
- 2. An examiner's amendment appears below.
- 3. Examiner withdraws all rejections to all claims.

Examiner's Amendment

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview and via email with Thomas J. Onka (reg. number 42053) on 8-30-2005.

The application has been amended as follows:

Claim 17 has been amended as follows.

17. (currently amended) In a modem an echo cancellation method, said modem for establishing communication between a first and a second device via a communication medium, said modem passing a transmit signal generated by the first device via a transmit encoder to the communication medium and passing a receive signal from the communication medium to the first device via a receive decoder, said modem comprising an inverse fast

Art Unit: 2643

Fourier transform circuit for converting said transmit signal from the frequency domain to the time domain and a fast Fourier transform for converting said receive signal from the time domain to the frequency domain, said modem coupled to the communication medium through a hybrid circuit, said echo cancellation method comprising:

aligning frames of the transmit signal with frames of the receive signal having echoes corresponding to the transmit signal;

generating a cyclic echo signal based on the transmit signal in the time domain using a sub-canceler structure;

adding said cyclic echo signal to the receive signal in the time domain; during a training period, coupling said adding step with said aligning step; during a training period, switchably coupling the result of said adding step to a frame aligner that aligns frames of the transmit signal with frames of the receive signal having echoes corresponding to the transmit signal;

generating an echo cancellation signal based on the transmit signal in the frequency domain and an adaptive signal;

subtracting said echo cancellation signal from the receive signal in the frequency domain; and

generating said adaptive signal based on the receive signal after subtracting said echo cancellation signal.

Allowable Subject Matter

5. Claims 1,2,6-9,13,14,16,17,19,20 are allowed over the prior art of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Jamal whose telephone number is 571-272-7498. The examiner can normally be reached on M-F 9AM-6PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis A Kuntz can be reached on 571-272-7499. The fax phone numbers for the
